Visa Type: German job-seeking visa

Languages

English, Hindi, Bengali – Fluent
German – A2

Hobbies

- Reading
- Badminton, Table-tennis, Floorball

Summary

Data Scientist in Berlin, Germany. Interested in **data science** and **machine learning**. During my M.S, I did **research** in analytic number theory.

Skills

Programming Languages: Python (packages: Pandas, scikit-learn, Seaborn, Matplotlib, SciPy, Numpy), SQL

Others: Github, LaTeX, Jupyter Notebooks, probability and statistics

Work Experience

Machine Learning Engineer (Intern) - 08/2022 to present
: Smart Steel Technologies GmbH, Germany

Education

Master of Science: **Mathematics** - 2022

Georg-August-Universität Göttingen, Germany

Thesis: [The Möbius Function on Arithmetic Progressions](#)

Bachelor of Science (Research): **Mathematics**- 2017

Shiv Nadar University, India

Thesis: *Dirichlet's Theorem on Arithmetic Progressions*

Certifications

Udemy Course: Machine Learning, Data Science and Deep Learning with Python. [Link to certificate](#).

Machine Learning and Visualization Projects

1. **MNIST:** I work with the MNIST data set and compare the performance of support vector machines, OneVsRest and random forest classifiers, and stochastic gradient descent algorithms. [Link](#).
2. **Housing in California (1990):** I predict housing prices from the California 1990 dataset. [Link](#).
3. **London weather:** I use Seaborn to visualise the data in the London Weather dataset. [Link](#).
